INTRO

CHORUS

We condemn atomic power. --> No more for us.
 Voices joining every hour. --> We want clean power.
 Generating volts from wind,
 and the sun, they are our friends.
 Switching to enviro-power.

VERSE 1:

So cold in the Dead Zone
 As Elena rides her motorbike back home
 Not a sound in the Ghost Town
 As Chernobyl waits nine hundred years or more

CHORUS

VERSE 2:

The Little Boy and the Fat Man
 find two hundred thousand victims on their hands.
 Bad luck from Prometheus;
 Hiroshima, Nagasaki never planned.

BRIDGE:

Old reactors left here for your children. --> Don't want them!
 Science raises golden rods and cylinders. --> Don't make them!
 Radiation worldwide is mounting,
 (like a summit meeting cash agreement.)
 Stop the earthly plight, of cancer-causing light.

CHORUS

...switching off atomic power.
